

ELEVATE YOUR EXTERIOR FACADES

HIGH-PERFORMANCE PET STUCCO PANELS FOR EXTERIOR WALLS

Built for commercial and residential buildings, coated PET panels combine strength, aesthetics, and weather resistance, in a lightweight, easy-to-install solution. The smart alternative to heavy concrete, fragile styrene foam and metal.

FEATURES:

- Moisture Resistant
- Lightweight
- Thermally Insulative
- Easy On-site Adjustments
- No Rot/Insect Damage
- No Special Equipment Needed
- Fast, Adhesive Installation
- Sustainable

COAT > MOUNT > COMPLETE

WHY CHOOSE PET STUCCO PANELS?

DESIGN FLEXIBILITY

- Easily machined and shaped
- No mechanical fastener systems required
- Compatible with a wide range of coatings, such as metallic paint and concrete stucco finish.
- Bring creative visions to life — no compromise on design.

IDEAL FOR:

- Commercial and residential facades.
- Retrofit projects on existing substrates.
- Coastal or high-moisture zone buildings.
- Designers looking for freedom and finish variety.
- Contractors needing reliable, easy-to-handle panels.

BUILT FOR HARSH CONDITIONS

- Excellent moisture resistance — ideal for coastal and humid environments.
- Thermoplastic closed-cell core — no rot, decay, or insect damage.
- Performs in extreme temperatures year-round.
- <1% Expansion and contraction in high temps - 185F/80C.

THERMAL EFFICIENCY

- Comparable insulation properties — 4.2/inch.
- Helps reduce energy costs and boost sustainability.

EASE OF LOGISTICS

- Lightweight for easier handling and transportation.
- No cranes or lifting equipment required
- Cuts down on labor, costs, and site delays.

INSTALLER-FRIENDLY

- Simple adhesive mounting
- Adaptable to customer design changes
- Repairs made quickly and cleanly if needed

READY WHEN YOU ARE

Thanks to durable PET foam that allows pre-coating in your shop and safe transport without risk of damage, experience short lead times with panels delivered jobsite-ready for year-round builds.
