# GURIT SECURES TWO-YEAR CONTRACT FOR GLASS PULTRUDED BLADE ROOT REINFORCEMENTS

Zurich, March 9, 2026

**Gurit (SIX Swiss Exchange: GURN) today announced the signing of a new two-year supply contract for its glass pultruded blade root reinforcement solution with a leading Wind turbine manufacturer in the Asia-Pacific region. The agreement is valued above CHF 10 million over the contract term.**

As wind turbine blades continue to increase in size, the structural demands on blade roots are rising accordingly. To meet these evolving requirements, many Western and Chinese blade manufacturers are shifting toward more advanced reinforcement solutions.

Gurit's high performance pultruded root reinforcements are custom-engineered for each blade model to ensure exceptional bonding performance at the critical root-end-connection interface, reducing the risk of bushing shear-out. Gurit's unique design results in more efficient root designs and tighter bushing spacing, resulting in smaller root diameters and lighter overall structures without compromising strength.

The awarding of this contract underscores the strategic decision to maintain and further develop Gurit's glass pultrusion product line, recognizing its long-term importance for next-generation blade designs.

Gurit's proven track record, engineering expertise, and reliable performance have positioned the company as a preferred supplier in a highly competitive wind market, serving multiple OEMs across Western and Chinese markets.

### About Gurit

The subsidiaries of Gurit Holding AG, Wattwil/Switzerland, (SIX Swiss Exchange: GURN) are specialized in the development and manufacture of advanced composite materials, composite tooling equipment and core kitting services. The product range comprises structural core materials, structural profiles, prepregs, formulated products such as adhesives and resins as well as structural composite engineering. Gurit supplies global growth markets such as the wind turbine industry, marine, building and many more. Gurit operates production sites and offices in Australia, Canada, China, Denmark, Ecuador, India, Mexico, New Zealand, Poland, Spain, Switzerland, United Kingdom, and the United States.
