

At Gurit (UK), we recognize that delivering value to our customers and fostering a safe, sustainable culture of operational excellence requires placing Quality at the core of everything we do.

Our mission is to provide innovative composite materials and design solutions for wind energy and lightweighting, guided by the Gurit Values. We are committed to developing and manufacturing these materials and solutions in an environment that prioritizes sustainability, effective risk management, continuous improvement, and customer satisfaction.

**We will achieve this with commitment to:**

- Consistently supply products that meet customer expectations
- Providing speedy response to customer demand
- Ensuring a stable supply of raw materials to enable on-time-in-full delivery
- Developing the future products and solutions that our chosen markets need
- Creating a sustainable and profitable business to meet the expectation of our stakeholders
- Conformance to applicable specifications and compliance obligations
- Fulfillment of company objectives and targets
- Encouraging effective, open and honest communication
- Developing mutually beneficial relationships with customers, suppliers and employees
- Utilising systems and metrics that support and enhance continual improvement
